SUMMARY

Front-End Developer specialized in building modern SaaS dashboards, scalable web applications, and responsive user interfaces using React, Next.js, TypeScript, Tailwind CSS, and modern frontend architecture patterns. Experienced in developing real-world projects including AI-powered dashboard systems, restaurant platforms, authentication workflows, localization systems (Arabic/English + RTL), responsive UI/UX, and modular component-based applications.

Skilled in state management, API integration, reusable frontend systems, performance-focused UI development, and deployment workflows using Vercel and Supabase.

Comfortable using AI-assisted development workflows for frontend architecture planning, debugging, UI refinement, productivity optimization, and scalable interface development.

Focused on building practical production-style applications with clean code, organized structure, responsive behavior, and realistic user experience.

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript
- **Frontend:** React.js, Next.js (App Router), React Hooks, Component Architecture
- **Styling & UI:** Tailwind CSS, Sass / SCSS, Bootstrap, Framer Motion, Responsive Design, RTL Support, Dark / Light Theme Systems
- **State Management & APIs:** Zustand, REST APIs, JSON, Authentication Flows, Protected Routes
- **Backend & Services:** Supabase, SQL Basics, API Integration
- **Tools & Workflow:** Git, GitHub, VS Code, Figma, Vercel, AI-Assisted Development Workflows
- **Architecture & Practices:** Reusable Components, Scalable Frontend Structure, Localization Systems, Performance Optimization, Clean Code, Mobile-First Development

PROJECTS

NexusDesk — AI-Powered SaaS Workspace Dashboard

Next.js 16 • React 19 • TypeScript • Tailwind CSS • Supabase • Zustand • Groq AI

Built a modern SaaS workspace/dashboard focused on scalable frontend architecture, responsive systems, authentication workflows, localization (Arabic/English + RTL), dashboard analytics, AI-assisted interactions, Kanban task management, calendar systems, reusable UI components, and protected dashboard access.

- Implemented responsive layouts across desktop, tablet, and mobile devices.
- Built reusable dashboard systems and modular UI architecture.
- Integrated Supabase authentication and protected route workflows.
- Implemented localization systems with RTL support.
- Developed AI-assisted dashboard workflows using Groq AI.
- Applied Zustand state management across dashboard modules.
- Built responsive task boards, project management systems, employees systems, and calendar workflows.
- Deployed on Vercel with production-ready frontend structure.

Bzeyada Restaurant Ordering Platform — Real Client Project (Saudi Arabia)

Next.js • React • Tailwind CSS • MongoDB • REST APIs • Leaflet Maps

Built a production-ready online restaurant ordering platform for a real restaurant client in Saudi Arabia.

- Developed scalable reusable frontend systems using Next.js.
- Built advanced cart logic with addons, quantity rules, and pricing calculations.
- Implemented OTP authentication workflows.
- Integrated map-based address selection using Leaflet Maps.
- Developed responsive ordering flows and mobile-first UI systems.
- Built API-connected restaurant management features.

Bashamelo Menu — QR Restaurant Menu Web App

Next.js • TypeScript • Responsive UI

Developed a modern QR-based restaurant menu designed for mobile-first customer experience.

- Built categorized menu browsing systems.
- Developed responsive UI optimized for restaurant customers.
- Implemented quick customer actions and smooth navigation flows.
- Configured production deployment, custom domain connection, SEO optimization, sitemap.xml, robots.txt, Google Search Console indexing, and Google Maps business integration.

Admin Dashboard Application

React.js • React Router • CSS3

Built a multi-page admin dashboard application with reusable layouts and scalable component structure.

- Developed more than 10 responsive dashboard screens.
- Organized reusable UI sections and navigation systems.
- Applied clean frontend architecture and maintainable structure.

Mawaqeeet — Prayer Times Web App

React.js • JavaScript • REST API

Developed a responsive prayer times application for Egyptian governorates using API integration.

- Implemented live prayer countdown systems.
- Integrated external prayer time APIs.
- Built responsive city selection and clean UI systems.

Personal Portfolio Website

Next.js • Tailwind CSS • Framer Motion

Designed and developed a responsive personal portfolio website showcasing projects, skills, and frontend development work.

- Built responsive layouts and animated UI sections.
- Applied reusable component architecture.
- Optimized presentation and user experience across devices.

EDUCATION

Bachelor of Law (LL.B.)

2021 — 2025

Assiut University — Faculty of Law

TRAINING & COURSES

CLS Learning Solution Certificate — Full-Stack Web Development Program | 2025

190 Hours | Online

- Studied frontend and backend fundamentals including:
HTML, CSS, JavaScript, TypeScript, Bootstrap, SASS, Vue.js, PHP, Laravel, SQL, and REST APIs.
- Practiced full-stack application structure, frontend systems, and API workflows.

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer

2024 — Present

- Built production-ready frontend applications using React, Next.js, and TypeScript.
- Delivered responsive UI systems, SaaS dashboards, and restaurant platforms.
- Worked on real client projects including restaurant ordering systems and QR menu solutions.
- Integrated APIs, authentication systems, localization, and deployment workflows.

ADDITIONAL TOOLS & DIGITAL SKILLS

- DaVinci Resolve (Video Editing & Content Editing Basics)
- Computer Troubleshooting & General Technical Support
- AI-Assisted Productivity Workflows
- Digital Content Preparation & Media Optimization
- Basic Cloud & Deployment Workflows
- File Management & System Organization
- Fast Adaptation to New Technical Tools & Platforms

LANGUAGES

- Arabic: Native
- English: Good Working Proficiency
